This project has been funded with support from the European Commission

# Project aims

In project, it was aimed to create an enjoyable learning environment for SEN students with the help of the lessons in which the students were volunteer participants and enjoyed, such as Music, Sport and Art.

In Each partner, there are different kinds of SEN students. However; intersection point of all partners consists of mild degree intellectual trainable students.

In the scope of current project, apart from observing the good implementations of partners and making inferences, our overall goals and objectives on SEN students to

- supply them an educational environment actualizing their social role, establish relationship and cooperate efficiently and effectively, adapt in developing environment and world, have knowledge of Europe citizenship, be productive persons
- help them improving basic life skills, self-maintenance, self control
- prepare them in their future life considering pupils' interest and abilities with the approaches, methods, techniques, implementations used in EU countries.

- we made movies

# Summary

During our Erasmus + project all participants learned and experienced innovative approaches, techniques and methods in an enjoyable environment.

By the usage of dissemination activities, we could draw attention to SEN students and innovative teaching methods for them both nationally and internationally.

Furthermore; this project managed to be an example for the others who have the same target group and wanted to give a chance for their SEN students to say "I am here, too!"
